

Employee Document Scanning & Management System

Objective: Scan documents from a connected scanner and upload them to the selected employee's folder. Employees can later log in to view and download their own documents.

Functional Workflow

1. Detect connected scanners.
2. Select and connect a scanner.
3. Search and select employee.
4. Preview scanned pages.
5. Scan and save as PDF.
6. Upload to employee folder.
7. Employee views/downloads documents.

Field	Description
DocumentId	Primary Key
EmployeeId	Employee
FileName	PDF File
FilePath	Storage Path
UploadedBy	Admin
UploadDate	Date

Recommended Free Scanner Library: NTwain (TWAIN), WIA (Windows Image Acquisition), or NAPS2 SDK. Store PDF files on the server and metadata in SQL Server.
